

MAXI -TIP

LONG LIFE SCRAPER BLADES 11.08

MAXI-TIP is manufactured from a premium compound of abrasion resistant TPU resins. Specially selected for stability and toughness, life spans of 4-6 times that of similar plastic scrapers have been reported. The designed flexing action of the MAXI-TIP provides *SUPERIOR* cleaning and plowing performance, allowing belt lacing to pass under the scraper. This substantially increases both belt and lace life! Moderate flexibility also allows easy assembly on trough angles, V-plows and "arc" mounts. Suitable for use in many FDA/USDA applications.

MAXI-TIP II scraper is manufactured for use in all FDA/USDA applications, where more rigidity and stiffness is needed. This specially blended polymer is manufactured for its low friction and release properties. MAXI-TIP II can be used for pulley cleaning, heavy product plowing and general-purpose applications.

Dual Durometer scraper has a co-extruded rigid base for mounting, and a soft flexible tip all in one piece! The larger base allows for direct mounting to cross supports and frames, where a blade holder cannot be installed. Suitable in most USDA/FDA applications

Blade Holder is a 6005-T6 hardened aluminum extrusion, finished in clear anodize. This rigid holder allows Maxi-Tip scrapers to be properly presented to the work area, and maintain a constant, even pressure over its entire length. These holders help to keep your conveyors clean, neat, and sanitary.

MAXI-TIP 1-8	8 ft. sections	\$ 86.00 each
MAXI-TIP 2	8 ft. section	70.00 each
DUAL DUROMETER	8 ft. section	118.00 each
Aluminum Holder	8 ft. section	185.00 each
